DETAILED ACTION

1. The request filed February 27, 2006 for a request for continued examination (RCE) under 37 CFR 1.114 based on patent application 10/038,239 is acceptable and an RCE has been established. Claims 2-3 and 19 have been canceled and, **claims 1,4-18 and 20-22 are pending and have been examined.**
2. **Independent claims 1, 14 and 17** have been amended.
3. **Dependent claims 4 and 15** have been amended.
4. **No new claims** have been added.

Allowable Subject Matter

5. **Claims 1, 4-18 and 20-22** are allowed.
6. The following is an examiner's statement of reasons for allowance:
7. Referring to **the independent claims 1 and 17** the art on the record, namely Belanger discloses all the limitation of the claims before the claim was amended. However independent claims 1 and 17 are amended to incorporate dependent claims 2-3 and dependent claim 19 respectively. Besides, the extra limitation of "**storing at least location references for virtual media resources**" have been added on both the independent claims 1 and 17. The combination of Belanger and Microsoft disclosed most of the limitation of dependent claims 2-3 and 19. However, during the telephone interview with applicant, it has been realized that neither the primary reference, Belanger nor the secondary reference, Microsoft, discloses that the following limitation that is recited in claim 1, "each node represents at least one of the virtual medial resources" or the following limitation that is recited in claim 17, "each node represents one portion of the plurality of virtual media resources."

None of the prior art of record taken singularly or in combination teaches or suggests a method of selectively providing data between networked devices, with all the limitation recited in the respective independent claims with the functional limitation of, **“storing at least location references for virtual media resources”** and the **above functional limitation** recited above.

For the reasons provided above, the amended independent claims **1 and 17** are allowed.

Referring to the independent claim 14, the claim is allowed for the same reason as that of the independent claims 1 and 17 because the claim contains the functional limitation of **“associating at least location references for a plurality of virtual resources to plurality of nodes”** Neither Microsoft nor Belanger reference discloses this feature. Therefore this claim is also found to be novel and is allowed

8. **The dependent claims 4-13, 15-16 and 18-22 and , which are dependent on the independent claim 1, 14 and 17** being further limiting to the independent claims, definite and enabled by the specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled “Comments on Statement of Reasons for Allowance.”
